

## Training and Information

*IFTS is an approved organization for Continued Professional Training*

### TRAINING SESSIONS RELATED TO THE TECHNIQUES OF SEPARATION AS WELL AS PARTICULATE CONTAMINATION

- W Procedures and Techniques of Solid-Liquid Separation (SLS)
- W Techniques for the treatment and dehydration of sludge
- W Particle size analysis and particle counting in liquids
- W Control of particulate contamination in industry, including mechanical, automotive and aeronautical
- W Filter media and filtrate testing.

### INTER COMPANY TRAINING SESSIONS

### INTRA COMPANY TRAINING SESSIONS

### PERSONALIZED TRAINING SESSIONS

### ACCESS TO A WEALTH AND UNIQUE DOCUMENTATION IN EUROPE

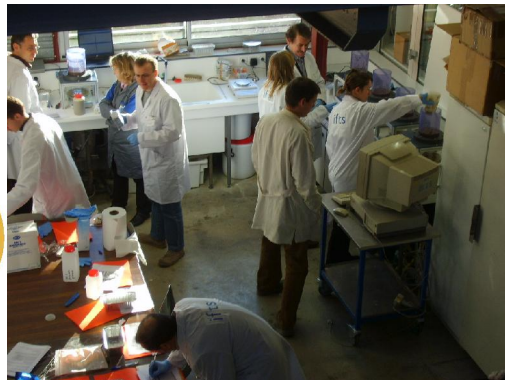

### SESSIONS OBJECTIVES:

- W To update your technical and scientific knowledge,
- W To understand the particularity and complementary of the different SLS techniques
- W To master equipment choice process,
- W To know how to optimize the functioning conditions.

IFTS role is to:

- W Follow and synthesize world research and results in Solid-Liquid Separation
- W Know the suppliers of all types of machines and products utilized in Solid-Liquid Separation
